Denmark
UCEAP Advising Notes

Objective
This document is an advising tool written by a Berkeley Study Abroad (BSA) Adviser to review program specific details that may impact a student's decision to apply for a UCEAP program. The document is not a summary of eligibility requirements, academic, housing, application and other logistical details freely available to students on the UCEAP and BSA website. If any concerns you have are not addressed on the UCEAP website or the Advising Notes document, please contact the BSA Adviser for this program.

COVID-19 Information
The COVID-19 pandemic continues to present challenges related to health concerns and international travel. UCEAP has been updating their website's Coronavirus Notice with up-to-date information. Please check this website for the most up to date information about which programs are running in the 2023-24 academic year.

Visas

US passport holders will be provided instructions on how to apply for a residence permit to study in Denmark after being admitted into the program. US passport holders do not need a visa to participate in programs lasting less than 90 days.

Non-US Citizens may need a visa in addition to a residence permit to study in Denmark.

Aarhus University

Aarhus is the second largest city in Denmark. It is a bike-friendly city on the water with a lot to offer. There are several pubs, restaurants and shops in the downtown area. It also includes a beautiful art museum.

Housing

Housing is guaranteed for University of California students studying at Aarhus. All students live in their own room. A variety of options exist and may be a short bus or bike ride from campus. Students must accept their housing offer shortly after they receive it via email.

Academics

Aarhus University offers hundreds of courses in a variety of fields in English including but not limited to arts, business, social sciences, sports medicine, chemistry, and computer science. It is important to click on “Exchange” in the online course catalog (which you can find in the UCEAP Academics section of the website) to see which courses are open to you. Please choose courses that state English only, not Danish + English.

In addition to disciplinary courses, Aarhus offers Scandinavian culture courses for exchange students. It is not possible to take Danish language at Aarhus University but students interested
in learning the language can do so at a private center for a fee. Unfortunately, there are no
course offered in English at Aarhus University.

**Student Life**

Aarhus University offers exchange students a buddy. These are Danish students who have
committed to assisting your transition to Aarhus. Each department runs its own buddy system
and so they may run a bit differently depending on your field of study.

Aarhus University’s International Office hosts Intro Days for all exchange students where they
provide assistance with the Danish Registry, share tips on academic culture, teach students
about renting and riding bikes, and more.

The Student House is a non-profit organization that provides extracurricular programs for all
Aarhus University students, including exchange students. They focus on bridging the gap
between business, students and culture in Aarhus. They provide a social welcoming program
the first two weeks of each term, and host 2-3 events per week including trips around Denmark,
game nights, a weekly international night, a second hand bazar, language training, and more.
The house includes a café, concert venue/cafeteria and bar.

**Copenhagen Business School Summer**

This is a relatively new program offered by UCEAP. You do not have to major in Business in
order to apply for this program so it’s a great choice for all students who want to take business
courses.
Program Capacity Constraints

UCEAP has a limited number of placements at University of Copenhagen. There is more capacity for Berkeley students in spring semester than in fall semester. Please contact the Denmark Adviser to indicate your interest in applying and discuss possible back-up options. Because UCEAP has restricted capacity at University of Copenhagen, it is not possible to extend from fall to spring.

Housing

There is a sizable up-front cost for the housing deposit + one month’s rent, currently from $3,000 to $6,000, that is required in May/early June or November/early December.
before departure for the program, and before financial aid is disbursed. Students should plan to have a way to pay this such as a loan or credit card.

Students will apply for housing when they fill out the University of Copenhagen application, either in April or October, depending on the term of study. Students living in kollegiums will be required to pay the remaining total housing cost two weeks after the program starts.

The housing market in Copenhagen is extremely tight. You will be assigned a room in a residence hall, a rented room or an apartment, depending on your preference as well as housing availability. Within these options you may live with Danish students, UCEAP students or international students. Students do not always get their first choice of housing, so try to remain as flexible as possible. Your housing may or may not be close to where you take class. The University of Copenhagen is in an urban setting, the classrooms are spread out around the city, and you will travel 20-30 minutes by either bicycle or metro between home & class.

Academics

The University of Copenhagen has one database that lists all courses offered for the academic year and is available for the upcoming academic year on May 1st. It is accessible from the Academics tab on the UCEAP program website. The course description for any course will always specify whether the course is going to be taught in Danish or English.

Students are required to take a normal load of 30 ECTS credits each semester in the Danish system. Below is a breakdown of how ECTS convert to UC units.

- 5 ECTS = 2.7 semester UC units
- 7.5 ECTS = 4 semester UC units
- 10 ECTS = 5.3 semester UC units
- 15 ECTS = 8 semester UC units

After UCEAP accepts students into the program, the Univ. of Copenhagen will ask students to fill out a separate application and they must choose a faculty, or department, where they will take the majority of their courses. In deciding which faculty (department) to apply to, students choose the field of study they have substantial background in. If you apply for more than one faculty or department you will slow down the process of final admittance. As an exchange student, once you are admitted to any faculty, if you want to take one or more courses in another faculty you will be able to contact the department to request this.

UCEAP students are encouraged to take a mixture of courses in their faculty and Scandinavian Culture courses that are just for international students. The Faculty of Social Science also has courses about Danish Society, such as the Danish Welfare Model, Denmark in the EU, and the Danish Economic System, that you don’t need to be admitted to the Faculty of Social Science to enroll in.
In the Science Faculty courses are taught in block periods. The semester is divided into two 8-week periods; each is called a block. The first 7 weeks of the block are for instruction and the last week is for the final. Students typically enroll in 2 courses per block. Blocks 1 & 2 are in Fall Semester and Blocks 3 & 4 are in Spring Semester.

Undergraduates can take 1st Year Masters level courses. The Danish academic system consists of three years of undergraduate study followed by 2 years of graduate study. Almost all University of Copenhagen faculties, including Science, offer courses in English at the Masters level, although there are some exceptions. Undergraduates can take first-year Masters courses or “400” courses which are similar to upper-division courses at UC Berkeley. The recommendation is to take only one Masters course at a time.

In Denmark, the final exam is often the sole determination for your grade in the course. This may seem intimidating, but if you are ever uncertain about what to study or how to prepare just approach your professor. Professors are informal (first-name basis) and very accessible and will be happy to answer any of your questions.

Fall Semester Considerations

In the Fall semester, block 2 lasts from the third week in November until the end of January. Because UCB students who need to return to the U.S. for the holiday period and the start of spring semester at UCB would miss the last 3 weeks of the course, including the finals period, it is recommended that students not take Science courses in Block 2, but rather take a semester course that would permit an early final exam. Year or Spring students don’t have worries about Science courses in the 2nd block of the semester because they can remain until the end of the course.

All other faculties have semester-long courses, with a few possible exceptions. All instruction for semester courses ends at or by the end of December, sometimes even as early as November. It is possible for a semester course to have a final in January. Students who have January finals should request an early exam from the Exam Coordinator and inform the Instructor.

When choosing courses for fall semester, the student should pay close attention to the exam dates listed in the course description.

Research

Students can do research in lieu of taking courses. Research can be combined with course work to obtain 30 ECTS credits. To find a research group or a project you’d like to work with, you can email the professor of any course you think might be related to your research interests to find out if there are any projects being conducted by Masters, Ph.D. or postdoctoral students that you could work with. The UCEAP Program Coordinator will also be available to refer you to someone in the department to see if it might be possible for you to work with a current research
team. The Program Coordinator and the department will help you work out the number of units that the research will count for. Normally a paper is required at the end of the research project.

Student Life

There will be a question on the University of Copenhagen host university application about whether you would like to be assigned a Danish student as a mentor or buddy. If you answer ‘yes,’ you will be assigned a mentor group from the faculty you’ve been admitted to. A mentor or buddy may not be available right when you arrive in Denmark for the start of the program because school starts three weeks later for regular students. Mentors will assist with your transition and invite you on outings during the semester with your mentor/buddy group.

Students with Disabilities

All forms of public transportation have accommodations for persons with disabilities, though many buildings are not easily accessible. Getting to the bus stop or train station can be difficult. Not all student halls have rooms designated for those with physical disabilities. For more information about traveling with a disability in Denmark, visit:

Visit Denmark, Disabled Travel
Danish Association of the Physically Disabled (DHF) Visiting Denmark Resources

In Denmark, students with disabilities are under the care of the regional county and not of the university. This means that without a Danish CPR number, students with disabilities cannot expect to receive much help. Once you obtain a CPR number you can get limited public assistance. You may also need to have adequate resources to pay for assistance from the private sector. UCEAP provides instructions about how to obtain a CPR number after students are admitted to the program.

Please review these resources about what accommodations may be available at each university:

University of Aarhus Support Services and Special Education Support
University of Copenhagen Student Support

Please review the I am a Student with a Disability page to review the process for requesting accommodations for a study abroad program.

LGBTQIA+ Identifying Students

Threat to safety towards the LGBTQI community is minimal. Societal tolerance ranges from tolerant to accepting. Review tips and resources for LGBTQIA+ Identifying Students.
Working Abroad

Semester or year long program students may be able to work up to 20 hours per week if they have a student Residence Permit for Denmark. Past students have tutored high school or primary school kids in English and have also worked in cafés, shops, and even the post office. Some students have also earned minimum wage working as lab assistants for professors.

Summer students are on a tourist visa and not legally able to work.
