

# Berkeley Study Abroad

As of **summer 2021**, UC Berkeley will no longer accept the summer UC Education Abroad Program (UCEAP) physics series in any of the program locations to satisfy the Physics 8A and 8B sequence. We encourage students to plan to take physics 8A and 8B here at Cal during the fall, spring or summer terms, or at another institution which offers coursework deemed equivalent. We also encourage you to meet with your academic advisor to help you revise your academic plan. We hope to work with the parties involved to offer other options in the future.
